REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:

The Applicant claims an oxygen electrode in a fuel cell including a cathode active material having oxygen storage capacity comprising a redox couple, which provides for the oxygen storage capacity.

Applicant claims a fuel cell including a cathode active material having oxygen storage capacity comprising a redox couple, which provides for the oxygen storage capacity.

In the prior art of record, Kaneko et al., U.S. Pat. No. 4,362,791, discloses a redox battery having a redox system comprising an aqueous solution containing an ion with variable valencies as an energy source, utilized in the form of a positive or negative electrolyte. Kaneko et al., U.S. Pat. No. 5,318,865, discloses a redox battery having a positive electrode having air or oxygen as the active material.

However, the prior art of record does not suggest, either alone or in combination, a fuel cell including a cathode active material having oxygen storage capacity comprising a redox couple, which provides for the oxygen storage capacity.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Angela J. Martin whose telephone number is 571-272-1288. The examiner can normally be reached on Monday-Friday from 9:00 am to 5:00 pm.
